OBJECTIVE

Full-Stack Web Developer with hands-on experience building scalable MERN applications, enterprise management systems, and interactive educational platforms. Skilled in React.js, Next.js, Node.js, Express.js, MongoDB, TypeScript, REST APIs, and modern frontend engineering through internships, freelance projects, and self-driven software development. Currently pursuing a Diploma in Computer Engineering with a Semester-I SPI of **9.43/10 (Institute Topper)** and passionate about developing performant, user-centric web applications.

EDUCATION

Diploma in Computer Engineering, Bhuj Polytechnic College 2025 - Present
Current Semester: III
Semester-I SPI: **9.43 / 10 (Institute Topper)**

Secondary School (SSC), Cambridge English School 2025
Percentage: **85.64%**
School Rank: **2**

SKILLS

Languages	HTML5, CSS3, JavaScript (ES6+), TypeScript, Python, C, Bash
Frontend	React.js, Next.js, Redux, Tailwind CSS, Vite
Backend	Node.js, Express.js, GraphQL, REST APIs
Databases	MongoDB, MySQL, PostgreSQL
Cloud	Firebase, Google Cloud Platform (GCP), Vercel
Testing	Jest, Supertest, Vitest, API testing with Postman
Developer Tools	Git, GitHub, CI/CD (Vercel auto-deploy), VS Code, Linux, Kali Linux, npm, PowerShell, Figma,

EXPERIENCE

Full Stack Web Developer Intern Nov 2025 - Dec 2025
CodeAlpha *Remote*

- Engineered a full-stack **MERN** E-Commerce platform handling **[X]+** products, with secure JWT authentication, product management, shopping cart, and RESTful APIs backed by MongoDB.
- Built a real-time chat application using **Node.js**, **Express.js**, **Socket.io**, and WebSockets, supporting **[X]+** concurrent users with secure authentication and instant messaging.
- Reduced integration bugs by following Git-based version control, API testing with Postman, and structured code review workflows across **[X]** sprint cycles.

MERN Stack Developer Intern Nov 2025 - Dec 2025
Codec Technologies India *Remote*

- Built **[X]+** MERN applications implementing authentication, CRUD operations, and REST APIs, cutting average feature turnaround time to **[X]** days.
- Refactored backend architecture using modular Express.js routing and reusable middleware, reducing duplicate code by **[X]%** and improving query response time by **[X]%**.
- Collaborated remotely with mentors on full-stack development workflows, project architecture, and debugging, contributing to **[X]+** completed feature deliveries.

Freelance Full Stack Web Developer Jan 2024 - Present
Self-Employed (Kush & Vishan Development) *Remote*

- Delivered **5+** production full-stack web applications for clients across **[X]+** domains using React.js, Next.js, Node.js, Express.js, and MongoDB, maintaining **100%** on-time delivery.
- Owned the complete SDLC – requirement gathering, UI implementation, backend development, deployment, hosting, domain configuration, and database setup – for **[X]+** client projects end-to-end.
- Built and tested a production SaaS platform (EventCure) using **Jest**, **Supertest**, and **Vitest**, implementing a secure JWT-based auth and OTP password-reset flow, cutting manual QA regressions by **[X]%**.
- Translated client requirements into scalable solutions directly with stakeholders, maintaining **[X]+** recurring client relationships through Kush & Vishan Development.

PROJECTS

Virtual Science Lab. Built an AI-powered interactive science learning platform with 3D physics simulations, chemistry visualizations, and a real-time equation explorer, reaching **[X]+** users with **[X]+** simulations. Stack: React.js, Three.js, React Three Fiber, Matter.js, Cannon-es, RDKit, Plotly, Chart.js, Tailwind CSS, Framer Motion. [\(Live\)](#) [\(GitHub\)](#)

EventCure – Event Hospitality Management Platform. Designed a production-ready hospitality SaaS centralizing guest management, QR-based check-in, transport coordination, workforce management, and analytics dashboards, cutting manual front-desk workflow time by **[X]%**. Implemented JWT auth, OTP password reset, and a Jest/Supertest/Vitest test suite covering **[X]+** test cases. [\(Live\)](#) [\(GitHub\)](#)

Toolify – Multi Tool Web Application. Engineered an offline-first productivity platform with **60+ browser-based utilities** (PDF tools, media converters, image processing, calculators, security tools) serving **[X]+** users with **100%** client-side processing and zero server uploads. Stack: React.js, Vite. [\(Live\)](#) [\(GitHub\)](#)

StyleForge – CSS Utility Platform. Built a CSS utility platform with **18+ interactive generators** (gradients, glassmorphism, neumorphism, flexbox/Grid playgrounds, clip-path, animations) with live preview, cutting manual CSS authoring time by **[X]%** for **[X]+** users. Stack: React.js, Vite, Tailwind CSS. [\(Live\)](#) [\(GitHub\)](#)

CERTIFICATIONS & ACHIEVEMENTS

- **Google Cloud Skills Boost** – Earned multiple badges through the Google Cloud Arcade Facilitator Program 2025.
- **CodeAlpha** – Full Stack Web Development Internship Completion Certificate.
- **Codec Technologies India** – MERN Stack Development Internship Completion Certificate.
- **Institute Topper** – Semester-I SPI: **9.43/10** in Diploma in Computer Engineering.
- **Academic Excellence** – Secured **85.64%** in SSC and achieved **School Rank #2**.

LEADERSHIP

- Led end-to-end freelance web development projects by managing client communication, project planning, development, deployment, and post-launch support.
- Collaborated effectively with remote development teams during internships using Git-based workflows, code reviews, debugging, and task management.
- Assisted classmates in React.js, JavaScript, Git, and MERN Stack concepts while contributing to collaborative academic projects.

EXTRA-CURRICULAR ACTIVITIES

- Build and maintain open-source full-stack applications while continuously exploring modern web technologies, AI, and cloud computing.
- Regularly experiment with UI/UX design, frontend animations, and developer tools to improve software engineering skills.

- Enjoy exploring emerging technologies, solving technical challenges, traveling, and participating in collaborative developer communities.
